

### User Story 3: View a Question

Test: Check if you can see the question appear and disappear when you click an adjacent square and then a non-adjacent square.

Expected: After clicking on an adjacent square, the screen should look like this.

Actual Steps: Run the project in Visual Studio, then click on the adjacent tile to the right of the start tile. Check to see if the question popup appears and that the screen matches the image above. If so, the first step is complete. Otherwise, this is a failure.

Next, click on another tile that is not adjacent to the tile with the red outline. The question popup should disappear and the screen should match the image below. If so, this manual test is complete. Otherwise, this is a failure.

Expected: After clicking a non-adjacent square, the screen should look like this.
